IISEE updates brochure and publish it

By Dr. Tatsuya Azuhata, Director of IISEE

IISEE has updated our brochure and made it available on our website at the URL:

https://iisee.kenken.go.jp/HP_training/pdfs_top/brochure_en.pdf

This brochure introduces the IISEE and each training course and outlines the application process.

Please take a look at it if you are thinking of participating in the IISEE

Training Course. We would also appreciate it if you could use this brochure to encourage young researchers around you to apply for our Training Program.

What we do

International Institute of Seismology and Earthquake Engineering (IISEE) invites engineers and researchers from earthquake prone developing countries, provides training on seismology, earthquake engineering and tsunami disaster mitigation, and performs research and development related to the fields. By March 2020, a total of 3,915 participants from 103 countries and regions. We have played an indispensable role in the mitigation and prevention of earthquake and tsunami disaster in the world, and at the same time has been contributing to international friendship, goodwill and cooperation through this training program.

Call for Papers

IISEE Bulletin is now accepting submissions of papers for the seismology, earthquake engineering, and tsunami. Developing countries are targeted, but are not limited. Your original papers will be reviewed by the editorial members and some experts. NO submission fee is needed. Try to challenge!

Contact Us

The IISEE Newsletter is intended to act as a go-between for IISEE and ex-participants.

We encourage you to contribute a report and an article to this news-letter. Please let us know your current activities in your countries. We also welcome your co-workers and friends to register our mailing list.

ISEE hold the 3rd general meeting

By Dr. Tatsuya Azuhata, Director of IISEE

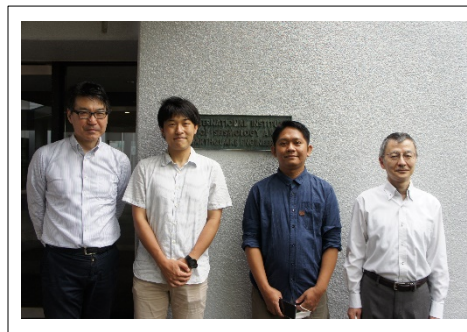

With the group training coming to an end, we held the third general meeting on 14 May. At this meeting, the participants and IISEE, and JICA staff gathered together to discuss the improvement of the training. Due to the COVID-19, we mainly conducted this year's training through remote lectures. There were concerns about whether the training was satisfactory or not, but the feedback from the trainees was quite positive. However, someone said that they did not have enough time to understand the content of the lectures and that there were not enough opportunities for onsite training. There is still time for individual study, etc. IISEE will do its best to meet the needs of the participants within the remaining training period.

3rd general meeting

Participants' arrival in Japan

By Dr. Tatsuya Azuhata, Director of IISEE and Mr. Takahiro Yamada, Head of Administration Division, IISEE

In the difficult situation of global infection of COVID-19, we had an online opening ceremony of the training courses in Seismology, Earthquake Engineering, and Tsunami Disaster Mitigation for young researchers and engineers on Oct 2nd. IISEE One year training course has started, and participants began coming to Japan one by one.

Seven participants from El Salvador, Chile, Bangladesh, Malaysia, and Timor-Leste began commuting to BRI on Nov 16th, followed by four participants from Indonesia and Bhutan on Dec 7th. Recently, another participant from Philippines arrived in Japan on Jun 9th and has been commuting to BRI since June 25th.

Currently, participants are in the stage of their individual studies, and they are working hard to complete their master reports.

In Jun, Tsukuba is getting hot and humid. Because of the COVID-19, they cannot travel anywhere further, but they are putting significant efforts to achieve their goals.

Please do your best.
